

Curriculum Vitae

Gian Lorenzo Meocci

Senior Software Engineer

glmeocci@gmail.com

<https://github.com/meox>

Home city: Barberino Val d'Elsa (Firenze)

Birthday: 8 July 1982

Mob: +39 328 6118368

Professional Experience

- July, 2019 - Present Senior Software Engineer @RStor (Italy (Florence), USA (Saratoga)).
1. Backend developer (Go)
- Oct, 2018 - June, 2019 Senior Software Engineer @Extendi S.r.l. (Florence, Italy).
1. Backend developer (Ruby, Elixir)
- Jan, 2016 - Oct, 2018 Senior Software Engineer @Commprove S.p.A. (Florence, Italy).
1. Application Engineer for C++ (C++14/17) server application: Fast Data Aggregation and Analysis
 2. Backend developer (Elixir)
 3. BigData Solution Architect: Impala and Spark data aggregation layer
- Dec, 2012 - Dec, 2015 Software Engineer @Commprove S.p.A. (Florence, Italy).
1. Application engineer for C++ (C++11, C++14) server and client environment
 2. Web Application developer: mostly in HTML5, JavaScript (jQuery) and PHP
 3. BigData group Founder and Member
- Sept, 2010 - Nov, 2012 Software Developer @Iamboo s.r.l (Pisa area, Italy)
1. Application developer in C++ and Qt 4.7
 2. Application developer for embedded systems (Raspberry PI, IGEP v2)
 3. Web Application developer (PHP, HTML5, Javascript, jQuery, JSP, JSTL)
- Jan, 2009 - Aug, 2010 Software Developer @C.T. Elettronica s.r.l (Florence area, Italy)
1. Application developer (C, C++ on Linux System)
 2. GUI developer (C++ and Qt 4.7)
 3. Web Application developer using PHP and Perl on server side and JavaScript (jQuery) on client side
- Apr, 2008 - Dec, 2008 Member of European project SARC, "Research on compilation-time methods for scalable architectures", @University of Pisa in collaboration with University of Siena. The project was developed in C and Perl.

Professional Experience (continued)

- Jan, 2008 - Mar, 2008 Member of European project SPEED, “Research on prototype implementation of methods of encryption with property of Homomorphic regarding sum and/or multiplication”, @University di Siena. The project was developed in C++.
- Dec, 2007 Consulting and application developer for Java infrastructure(J2SE) @Agora ICT (Sienna, Italy)

Education

- Dec, 2007 MSC in Computer Engineering (“Laurea in Ingegneria Informatica” 35/S) (Honours). Research area: Security computation and Cryptosystem, title of thesis: “Studio, sviluppo e valutazione di un criptosistema omomorfo”. The project was developed in C++. (University of Sienna)
- May, 2005 BSC in Computer Engineering (“Laurea in Ingegneria Informatica”); vote: 100/110. The project was developed in C, Java and Matlab. (University of Sienna)
- July, 2001 Scientific high school degree (“Diploma di maturità”) at Liceo Scientifico Alessandro Volta. (Colle Val d’Elsa, Italy)

Specialization and Course

June 2020	Functional Programming in Erlang (University of Kent)
Jan 2018	Programming Languages, Part B (Scheme/Racket)
June 2016	Functional Programming Principle in Scala
June 2015	Principles of Reactive Programming (Scala)
December 2014	FP101x Functional Programming course on Edx
08/10/2007	Summer School on Parallel Computing [Advance course] - CINECA (Bologna, IT)
05/09/2005	Summer School on Parallel Computing - CINECA (Bologna, IT)

Skills

Main Programming Languages	C++ (C++14/17) with STL and Boost, GoLang
Functional Programming Languages	Elixir, Scala(basic), Haskell(basic), Racket(basic)
WebProgramming	PHP, JavaScript, HTML 5 / CSS
Operating System	Debian Linux (advanced level), OpenIndiana, Solaris 10 (basic level)
BigData	Impala and Spark framework on Cloudera distribution
Personal interests	Programming Languages, Linux, #FP
Foreign Languages	Italian (native), English (B2/Intermediate)
License driving	Italian license for vehicle type B
